# FAS-MARK™

## Cap & Cover Paint

*Fas -Mark Cap & Cover paint is ideally suited to meet the demands of the retail petroleum market. A special acrylic modified formula resists gasoline, diesel, ethanol, etc. The high solid, fast drying formula in Fas-Mark can be used to mark & identify manhole and tank valve covers.*

*The clean spray pattern means little or no over spray, so no need to lift the covers just spray them in place! It can also be used on island forms, equipment, any other clean metal surface, wood, concrete, etc. Use Fas - Mark cap & cover paint wherever you need a long lasting, bright color .*
